TABLE OF CONTENTS

CELETTE

PAGE 7-20

Celette, founded in the 1970s, is a top automotive brand known for its precision collision repair equipment, especially frame alignment systems, setting industry standards.

PRO SPOT
AUSTRALIA

PAGE 21-28

ProSpot, established in the automotive sector, is renowned for its state-of-the-art welding and repair equipment. Their innovative solutions, particularly in spot welding, set industry standards, ensuring efficient and reliable repair outcomes.

Yashima

PAGE 29

YASHIMA combines cutting-edge technology with reliability. Favored by major Japanese car makers and body shops, it leads the market in customizable water-cooled welders.

CAM
AUTO
GPR

PAGE 30-33

CAMAUTO delivers top-quality, efficient dent repair solutions for PDR and GPR technicians and Auto Collision Shops. With a range from Tabs to Welders, their rigorously-tested tools lead the glue pulling industry in innovation and reliability.

SPOTLIGHT

ON:

X-Trac – Standard

Lifting and pulling platform – Recommended for light and medium repair

X-TRAC is a lifting platform specially designed for light and medium repairs. Once the vehicle is positioned on the platform, it can be easily and rapidly lifted up by the wheels in order to enable the technician to get access to the anchoring points. X-TRAC has a secondary function, which can be used as a scissor lift for Sevenne Bench.

The Sevenne bench on wheels can be maneuvered comfortably to the desired lifting height.

In the event of structural component replacement, X-TRAC facilitates comfortable lifting height for Zinc primer application, Adhesive bonding, Rivetting and easy inspection.

X-TRAC provides a better working height during cutting and welding applications while the car is benched on Sevenne.

**4 tonne lifting
capacity**

X-ONE

X-ONE is a rapid lifting and pulling platform tailored for light and cosmetic damage repairs. With a 2500 kg lifting and 10 Ton pulling capacity, it's designed for quick loading and easy setup. The platform can be coupled with the electronic measuring system NAJA using an optional adaptation kit. It's ideal for smart, quick, and easy repairs.

X-TRAC

X-TRAC is a versatile lifting platform with a 4000 kg lifting and 10 Ton pulling capacity, designed for light and medium repairs. It allows technicians to rapidly lift vehicles by the wheels for easy access to anchoring points. Additionally, X-TRAC can function as a scissor lift for the Sevenne Bench, facilitating tasks like zinc primer application, adhesive bonding, riveting, and more.

SEVENNE

Sevenne is a universal mobile bench that can be upgraded to Rhone or Griffon. It features a peripheral frame for quick anchoring all around the bench, allowing for swift fixing of wheels, clamps, multi-function supports, and a steering handle.

GRIFFON VB

The Griffon VB is a mobile system with the added convenience of a drive-on bench that allows organizing any work bay into a straightening area. The bench remains mobile with the vehicle in position, thanks to the castor wheels. This bench is equipped with an inner lifting unit which can be operated by a remote control system with a lifting capacity of 2800 kg.

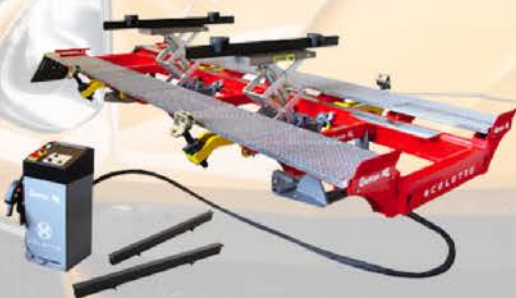

CELETTE®

GRIFFON

The Griffon is a drive-on bench with a 2800 kg lifting system, using a runway decking plate for easy vehicle setup. Its remote-controlled inner lift eliminates the need to dismantle anchoring components. For specific repairs, only sections of the lightweight decking plate are removed. It also includes a robust 10 Ton pulling unit.

GRIFFON XL

The 5.8 m long Griffon XL bench is specially designed for repairing commercial vehicles and SUVs. This length enables simultaneous repairs at both the front and rear of the vehicle. This bench is supplied with 2 independent inner lifting units and a hydraulic tilting system.

SMART RHONE

A flexible repair solution boosting body shop productivity. With a 3500 kg lifting capacity and 1300 mm height, it's versatile for various vehicles. The first to accommodate dedicated jigs (MZ+ system) and compatible with the CAMELEON universal adaptive jig system. Also pairs with NAJA 3D and EAGLE 3D measuring systems.

RHONE 4.2T

A versatile drive-on bench upgraded with a 4200 kg lifting capacity and a height of 1.32 meters. The Rhone 4.2T is designed for quick diagnosis and straightening, it's compatible with MZ/MZ+ and Cameleon universal bracket sets. The bench facilitates easy vehicle loading and is ideal for comprehensive repairs

CELETTE®

RHONE XL

RHONE XL: A 6-meter bench tailored for light commercial vehicles and long-wheelbase cars. Boasting a 5500 kg lifting capacity and a unique 1.3-meter lift height, it enhances productivity. Equipped with double scissor lifts, four cylinders, and a twin safety mechanism, the RHONE XL ensures robust performance and optimal working height for comprehensive repairs.

SEVENNE & SEVENNE XL

The Sevenne is a high-quality bench designed for vehicle repairs. The SEVENNE XL, its larger counterpart, is a versatile bench designed for both light and heavy vehicles. It offers a hydraulic tilting system and has a lifting capacity of 4200 kg. The bench comes with a hydraulic power unit, two inner lifts, four anchoring clamps, runway decking plates, and a rear lifting unit. Both products ensure efficient and accurate collision repair.

SYSTEM 5000

RHONE XL: A 6-meter bench tailored for light commercial vehicles and long-wheelbase cars. Boasting a 5500 kg lifting capacity and a unique 1.3-meter lift height, it enhances productivity. Equipped with double scissor lifts, four cylinders, and a twin safety mechanism, the RHONE XL ensures robust performance and optimal working height for comprehensive repairs.

DYNO 2000

DYNO 2000 is a mobile, powerful, and compact pulling tower designed for floor systems, specifically for light commercial vehicles. It can be adjusted to different heights and comes with a remote control for ease of operations. The tower is equipped with a 10T pulling ram and a hydro-air pump, ensuring consistent pulling force at all heights.

AUTOMAN equipment

QUALITY TOOLS FOR SERIOUS TRADESMEN

TETRAC +

TETRAC+ offers specific anchoring tools to hold the chassis of vehicles, particularly for brands like MB, BMW, Renault, and Nissan. Adaptable to Celette benches, Vegamax, and floor systems, TETRAC+ includes a set of four clamps and a ratchet strap. It provides dedicated anchoring solutions for several vehicle models, ensuring precise and secure positioning during repairs.

CAMELEON PREMIUM

The Cameleon Premium offers a customizable and adjustable fixture solution tailored for diverse vehicle repair needs. Its ergonomic design ensures smooth manoeuvrability, making it a go-to choice for technicians. The system is versatile, accommodating various car brands with specialized add-on kits.

CAMELEON VAS

The Universal Jig System CAMELEON is designed for precise vehicle repairs, emphasizing safety and proper use. It offers online registration, equipment selection, and various repair modes. Users can manage jigs, save configurations, and access detailed reports and diagnostics, making CAMELEON VAS a leading solution in vehicle repair adaptability and precision. VAS [VW, AUDI, SKODA]:

NAJA 3D

The Naja 3D is a cutting-edge computerized measuring system designed for comprehensive vehicle diagnostics, repairs, and re-manufacturing. It boasts wireless Bluetooth connectivity, ensuring seamless communication between the computer and the sliding head. With its high accuracy and user-friendly software, technicians can diagnose and address vehicle issues with unparalleled precision.

CELETTE®

AUTO MIG

The Auto Mig is a welding solution tailored for the automotive repair industry. While specific details are not provided, it's likely designed to offer precision welding capabilities, ensuring strong and durable repairs. Its name suggests a focus on MIG [Metal Inert Gas] welding, a common technique in vehicle repair.

INVERTER COMBI 200

The Cameleon Premium offers a customizable and adjustable fixture solution tailored for diverse vehicle repair needs. Its ergonomic design ensures smooth manoeuvrability, making it a go-to choice for technicians. The system is versatile, accommodating various car brands with specialized add-on kits.

TRIO DIGITAL

Trio Digital, while not detailed in the provided snippets, might be a digital diagnostic or measurement tool. Given the mention of "MZ CROSS", it could be a system that offers quick and accurate diagnostics using digital tram gauge technology, ensuring technicians have precise data for vehicle repairs.

EASY DENT 3000

The Easy Dent 3000 is a dent repair tool that uses hot glue and pulling tabs to remove dents from vehicles without the need for expensive and time-consuming repairs. It is user-friendly and can be used by both professionals and DIY enthusiasts. The tool is designed to be efficient, allowing users to remove dents quickly and effectively.

CELETTE®

EASY DENT 3000 - PLUS

The Easy Dent 3000 - Plus is a dent repair tool that offers dual welding modes (auto and manual) and an in-built intelligence system to adjust welding parameters automatically. With improved welding performance and less heat dissipation, it provides a powerful pulling operation. This tool has a max welding current of 3000A and operates on 220V. It is compact, weighing 22kg, and comes with a range of accessories and consumables.

INDUCTION HEATER

Celette's INDUCTION HEATER is a lightweight tool that utilizes high-frequency technology. It features a patented multi-functional torch with an isolation transformer and offers a power of up to 3000 watts. This versatile tool can be used for various applications including glass, stickers, screw, nut, and dent repairs.

PLASMA CUT 40NH

Celette's PLASMA CUT 40NH is a lightweight and efficient plasma cutting tool designed for car body repair. With a 40A current, it provides precise cutting for various materials like Fe, Al, and Cu. The inverter technology ensures accuracy, and the air-cooled torch body improves arc stability.

EASY DENT 3000 - COMPLETE

The Celette EASY DENT 3000 - Complete is a versatile dent repair system that offers dual welding modes (auto and manual) and an intelligent system that adjusts welding parameters automatically. This system includes the Easy Dent 3000 tool, Easy Puller Slide 600 puller, triangle holder, electrodes, tips, washers, carbon rods, and a slide hammer.

SPOTLIGHT

ON:

CAMELEON PREMIUM - VAS

CELETTE's Universal Jig System CAMELEON

The Camelon by Celette is an adaptable fixture system designed for vehicle repair, specifically known as the Universal Jig System VAS 811 023. This advanced system offers a comprehensive solution for diagnosing and repairing cars, allowing users to select the appropriate equipment, vehicle, and repair mode tailored to the specific damage.

With features like a diverse bench selection, mode choices based on accident severity, and a sophisticated jig building mechanism, the Camelon ensures precision and flexibility in the repair process. For professionals seeking a reliable and versatile tool that promises accuracy and efficiency in vehicle repair, investing in the Camelon by Celette is a wise choice. Its user-friendly interface, combined with its advanced technical capabilities, makes it an indispensable asset in any auto repair workshop.

CELETTE®

RAPID SPOT MINI - ENTREE

This lightweight dent repair tool offers a direct transformer connection for optimal performance. It is designed exclusively for thin sheet metal, providing zero overheating, rusting, or burning. With a maximum welding current of 5000A, it delivers precise and efficient dent repair.

DUO SPOT STEEL & ALU - 2-IN-1 ENTREE

A versatile dent repair tool designed for steel and aluminium panels. It offers spot torch and CD stud torch functionalities. This entry-level model delivers efficient dent repair for thin sheet metal.

TRIOXYCLEAN EXTENSIVE

The TriOxyClean Extensive is a vehicle disinfection unit designed by Celette. It is equipped with plasma solo patent technology, which effectively decomposes harmful volatile organic compounds (VOCs) such as formaldehyde, benzene, and ammonia.

BATPRO

The Celette BATPRO is a portable full-rise scissor lift table designed for replacing electric vehicle (EV) battery packs. With a lifting capacity of 2500 kg, it provides easy and secure handling of batteries during maintenance or replacement.

A red Aston Martin convertible sports car is parked on a red dirt road in a desert landscape. The car is the central focus, shown from a front-three-quarter view. In the background, the iconic red rock formation of Uluru rises against a cloudy sky. The foreground is filled with sparse, yellowish desert vegetation.

PRO SPOT

A U S T R A L I A

PROSPOT I4

i4

The I4 Inverter Resistance Spot Welder is designed to handle challenging materials like boron steels and Advanced High Strength Steels [AHSS]. With the option to upgrade to include a PR-155 MIG welder, the I4 offers versatile capabilities for various welding needs.

PROSPOT I5

The I5 Inverter Resistance Spot Welder provides exceptional welding performance for difficult-to-weld materials, including AHSS and boron steels.

PROSPOT I4S

The I4S Smart Spot Welder builds upon the features of the I4 and offers additional advantages. It is equipped with built-in training resources, providing technicians with immediate support for quicker job completion.

AL-5 | ALUMINUM DENT PULLING SYSTEM

Pro Spot AL-5 Capacitor Discharge Stud Welder is designed for aluminum dent pulling and can also be used with steel studs for welding to UHSS panels with no or very little heat applied to the panels. The welder is very easy to use and is controlled by one knob to adjust weld power. The welder auto detects the line voltage between 110 VAC - 240 VAC.

PRO SPOT

A U S T R A L I A

PROSPOT PR- 205MV WELDING SYSTEM

Prospot's PR-205MV is a versatile welding system suitable for diverse collision repair tasks. Offering spot, stitch, and projection welding, its microprocessor-controlled power supply ensures consistent welding. With user-friendly features and multiple modes, it's a must-have for repair shops.

PROSPOT SP-1 MIG WELDER

Lightweight and portable, Prospot's SP-1 MIG welder is designed for materials like steel, aluminium, and stainless steel. With a microprocessor-controlled power supply, it guarantees accurate welding. Its digital display, multiple modes, and attachments make it a valuable tool for precise welding tasks.

PROSPOT SP- 2 MIG WELDER

Prospot's SP-2 is a powerful MIG welder tailored for steel, aluminium, and stainless steel. Its microprocessor-controlled power supply guarantees consistent welding. With user-friendly features and various attachments, it's a top choice for diverse welding needs.

PROSPOT SP- 50P SPOT WELDER

Prospot's SP-50P is a versatile spot welder ideal for steel, aluminium, and stainless steel. Its microprocessor ensures accurate welding, while its user-friendly features enhance usability. With a range of attachments, it's invaluable for comprehensive welding tasks.

PRO SPOT

A U S T R A L I A

PROSPOT SP- 5.3 SPOT WELDER

The SP-5.3 by Prospot is a spot welder suitable for various materials. Its microprocessor-controlled power supply ensures consistent results. With user-friendly features and diverse attachments, it's a reliable tool for repair shops.

PROSPOT NP- 3 PLASTIC WELDER

Prospot's NP-3 is a versatile welder for repairing plastic parts. Offering multiple welding techniques, its range of attachments ensures it's equipped for various plastic repair tasks, making it a valuable addition to repair shops.

PROSPOT MWS-ST SPOT WELDER

Prospot's MWS-ST is a portable spot welder designed for diverse welding tasks. Its microprocessor-controlled power supply ensures precision. With a range of attachments, it's a versatile tool for repair shops.

PROSPOT MWS- AL SPOT WELDER

Tailored for aluminium welding, Prospot's MWS-AL spot welder delivers quality results. Its microprocessor-controlled power supply guarantees accuracy, making it an essential tool for aluminium welding tasks.

AUTOMAN
equipment

PRO SPOT

A U S T R A L I A

PROSPOT MWS-GTK SPOT WELDER

Designed for galvanized steel welding, Prospot's MWS-GTK spot welder ensures precision. With user-friendly features and diverse attachments, it's a top choice for welding galvanized steel.

PROSPOT MWS-GTK-AL- ST SPOT WELDER

Prospot's MWS-GTK-AL-ST is a versatile spot welder for welding galvanized steel and aluminium. With user-friendly features and diverse attachments, it's a reliable tool for diverse welding tasks.

PROSPOT PR- 5D RIVETER

Prospot's PR-5D is a versatile riveting tool designed for materials like steel, aluminium, and plastic. With a microprocessor-controlled power supply, it ensures precision, making it an essential tool for riveting tasks.

PROSPOT PR-5D RIVETING AND BONDING STATION

Prospot's PR-5D station offers riveting and bonding for diverse materials. With its user-friendly features and range of attachments, it's a must-have for repair shops.

PRO SPOT

A U S T R A L I A

PROSPOT DE-DA DUST-FREE SANDING SYSTEM

Prospot's DE-DA is a powerful sanding system for materials like steel, aluminium, and plastic. Its integrated vacuum system ensures a dust-free environment. With multiple modes and attachments, it's an indispensable tool for collision repair shops.

PROSPOT DE-COMBI DUST-FREE SANDING AND POLISHING SYSTEM

Prospot's DE-COMBI offers sanding and polishing for diverse materials. Its vacuum system ensures a clean workspace, making it ideal for collision repair shops.

PROSPOT DE-PRO DUST-FREE SANDING AND POLISHING SYSTEM

Prospot's DE-PRO is a top-tier sanding and polishing system. With a powerful vacuum system and diverse attachments, it's the most advanced system for repair shops seeking efficiency.

PROSPOT IONSTAR ANTI-STATIC GUN

Prospot's IONSTAR eliminates static electricity from painted surfaces. By preventing dust and dirt adherence, it ensures a pristine finish, making it essential for businesses aiming for impeccable paint jobs.

PRO SPOT

A U S T R A L I A

PROSPOT WINDSHIELD REPAIR KIT

Prospot's Windshield Repair Kit offers a solution for minor windshield damages. With a resin injector and curing lamp, it ensures effective repairs, making it essential for addressing windshield issues.

PROSPOT SPOT WELD DRILL

Designed for drilling out spot welds, Prospot's Weld Drill is both powerful and versatile. Suitable for steel, aluminium, and stainless steel, its features, including a digital display and cooling fan, ensure precision and ease of use. With specialized attachments, it's a crucial tool for collision repair shops, streamlining the removal of spot welds with accuracy and efficiency.

Yashima

YASHIMA YCS-20 C-BOY III

The YASHIMA 34.YCS-20 C-Boy III is a stud welding machine designed for automotive body repairs. It utilizes capacitor discharge technology and offers precise and efficient stud welding capabilities. With its advanced features and robust construction, the C-Boy III ensures reliable and quality welds for various applications.

YASHIMA YS-30 STUD MATIC III

The YASHIMA YS-30 Stud Matic III is a versatile and user-friendly stud welding machine. It is equipped with automatic stud feeding and welding capabilities, allowing for quick and efficient operations. The Stud Matic III offers a range of stud diameters and welding currents to suit different requirements, making it suitable for both automotive and industrial applications.

YASHIMA YS-50 WONDER WELDER

The YASHIMA YS-50 Wonder Welder is a powerful resistance spot welding machine. It is designed to deliver high-quality and reliable spot welds for various materials, including mild steel, stainless steel, and aluminium. With its advanced features such as multiple welding modes and adjustable weld parameters, the Wonder Welder offers flexibility and precision for professional welding applications.

CAMAUTO PREMIUM ELITE CART is a heavy duty, mobile cart that helps you carry all your PDR and GPR tools. Equipped with a drawer, and with a steel tab organizer top for better tools and tabs organization, and with two foldable trays, that can be used as a side table, and that can be bent for a better storage space.

INCLUDED IN THE CART:

- ELITE PRO LIGHT PULLER
- ELITE DOUBLE FEET
- LONG LEVER PULLER 3FT
- I-BAR MINI KIT (4 I-bars in 2 different sizes, and 3 aluminum hooks)
- CAMAUTO HEAT PROTECTION GEL
- CAMAUTO GLUE STICKS (pack of 20)
- 300W UL APPROVED GLUE GUN with temperature adjustment control
- 4 LONG TABS in 2 different sizes
- 15 FLEX TABS in 3 different sizes
- 20 BLACK PLASTIC HOOKS
- MINI LIFTER
- BIG KNOCKDOWN
- KNOCKDOWN KIT 4PCS
- 3D TABS 8pcs kit
- 3D CURVE TABS 8PCS
- FLAT TABS 18pcs kit
- UNIVERSAL ADJUSTABLE TABS 24pcs kit
- UNIVERSAL CREASE TABS
- 2 BAR TABS
- SLIDE HAMMER 5LBS
- 3 PULLING RODS

CAMAUTO BLACK PULL-C [BATTERY OPERATED]:

The CAMAUTO Black Pull-C is a versatile dent pulling tool that operates on battery power. It allows technicians to fix dents without the need for air or cumbersome hooks and anchors. With adjustable height and the ability to pull vertically or horizontally, it offers flexibility for various pulling scenarios. Its lightweight design, made from T6 Aluminium, ensures ease of use and portability.

CAMAUTO BLACK PULL-A [AIR OPERATED]:

The CAMAUTO Black Pull-A is an air-operated dent pulling tool that provides efficient and reliable dent repair solutions. It uses the power of air pressure to create a strong pulling force, allowing technicians to repair dents with precision. This tool is designed for versatility and ease of use, offering adjustable height and the ability to pull in different directions.

CAMAUTO LEG SUPPORT & DOWN PULL:

The CAMAUTO Leg Support & Down Pull is a specialized accessory designed to enhance the dent pulling process. With its adjustable leg support, it provides stability and support during dent repairs. The down pull feature allows technicians to apply controlled pulling force in a downward direction, aiding in the removal of stubborn dents and facilitating precise repairs.

CAMAUTO PREMIUM ELITE LOADED CART:

The CAMAUTO Premium Elite Loaded Cart is a comprehensive and convenient solution for storing and organizing PDR tools and equipment. With its sturdy construction and ample storage space, it allows technicians to easily transport their tools to job sites. The loaded cart comes equipped with various compartments, hooks, and holders, ensuring easy access and efficient organization of essential tools.

CAMAUTO PDR WARRIORS KIT:

The CAMAUTO PDR Warriors Kit is a comprehensive set of tools specifically designed for professionals in the paintless dent repair (PDR) industry. This kit includes a range of specialized tools, such as glue tabs, mini lifters, dent beams, leverage bars, and more. It provides technicians with everything they need to effectively and efficiently repair dents, making it an essential toolkit for PDR specialists.

CAMAUTO EURO KIT:

The CAMAUTO Euro Kit, aimed at collision repair technicians, provides a comprehensive set of tools for glue pulling repair. It includes a variety of plastic tabs, hooks, and a plastic case to facilitate dent repair without damaging the surface. The kit does not include a glue gun.

PDR TECH KIT:

The CAMAUTO PDR Tech Kit is a professional-grade package designed for paintless dent repair technicians. It offers a wide range of specialized tools and accessories, including various tabs, a glue gun, and a plastic case for convenient storage and organization. The comprehensive kit enables efficient and high-quality dent repair.

BIG KIT:

The CAMAUTO Big Kit is an advanced dent pulling and repair system suitable for professional technicians. It features plastic tabs and a glue gun to effectively straighten dented areas without causing further damage. With 90 pieces in total, this comprehensive kit provides the necessary tools for quality paintless dent repair.

MONSTER KIT:

The CAMAUTO Monster Kit offers an extensive range of tools and accessories for dent repair professionals. It includes a variety of plastic tabs, hooks, and a glue gun, enabling technicians to address a wide array of dents with ease. The comprehensive kit ensures efficiency, accuracy, and high-quality results in paintless dent repair.

PRO TECH KIT:

The CAMAUTO Pro Tech Kit caters to the needs of professional paintless dent repair technicians. This specialized kit includes a variety of plastic tabs, hooks, a glue gun, and a plastic case for organized storage. With its high-quality tools and comprehensive selection, the Pro Tech Kit facilitates efficient and reliable dent repair.

STARTER KIT:

The CAMAUTO Starter Kit is designed for beginners in the paintless dent repair field. It provides essential tools and accessories, including plastic tabs, hooks, a glue gun, and a plastic case for convenient storage. The Starter Kit offers an entry-level package to help new technicians gain experience and develop their dent repair skills.
